

Product Details

Summary

Product name	SARS-CoV-2 Surrogate Virus Neutralization Test Kit (N501Y)
Catalog#	ATK00017
description	<p>SARS-CoV-2 Surrogate Virus Neutralization Test Kit(N501Y)Based on the principle of neutralizing antibody ELISA, the concentration of neutralizing antibody against sars-cov-2 virus in serum or plasma can be detected. This antibody can block the interaction between RBD (n501y) and ACE2. The kit contains two key components: HRP labeled recombinant human ACE2 protein and sars-cov-2 virus RBD (n501y) protein.</p> <p>The kit is used to determine the concentration of RBD (n501y) neutralizing antibody in serum or plasma samples.</p>
Shipping	Blue ice transport.
Stability &Storage	<p>After receiving the kit, please store the positive control, negative control, test solution a and the pre coated plate at - 20 °C, the sealing film at room temperature, and the rest of the reagents at 4 °C.</p> <p>When the kit was stored at the recommended temperature for 6 months, the signal intensity decreased by less than 10%.</p>
