

## IL17A mouse monoclonal Ab

Images(2)

Cat.#: BF8019 Concn.: ~1mg/ml Mol.Wt.: 18kDa Size: 100ul Source: Mouse Clonality: Monoclonal

Application: IF/ICC 1:100-1:500, WB 1:200-1:1500

\*The optimal dilutions should be determined by the end user.

Reactivity: Human, Mouse, Rat

Storage: Rabbit IgG in phosphate buffered saline, pH 7.4, 150mM NaCl, 0.02%

sodium azide and 50% glycerol. Store at -20 °C. Stable for 12 months from

date of receipt.

Purification: The antiserum was purified by peptide affinity chromatography using

SulfoLink<sup>TM</sup> Coupling Resin (Thermo Fisher Scientific).

Immunogen: A synthesized peptide derived from human IL17A, corresponding to a

region within the internal amino acids.

Uniprot: Q16552

Description: IL-17A is a cystine-linked homodimeric pro-inflammatory cytokine

produced by Th17 cells, a distinct CD4+ T cell lineage (1,2). IL-17A stimulates the production of the pro-inflammatory cytokines IL-1?, TNF-?, and IL-6. IL-17A also induces production of the neutrophil chemoattractants IL-8, CXCL1, and CXCL6 thereby bridging adaptive and innate immunity (1,2). IL-17A is intimately involved in mucosal immunity against bacterial infections (1,3) and has a putative role in some autoimmune disorders (1,4). IL-17A effects appear to be exerted primarily through binding to the

IL-17RA . IL-17A binding induces production of cytokines, chemokines and

other proteins through activation of the Erk1/2 MAP kinase, PI3K/Akt, p38,

and NF-?B pathways (3,4, 6).

Western blot analysis of extracts from various samples, using IL17A mouse monoclonal Ab.

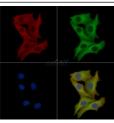

Lane 1: Mouse liver, blocked with antigen-specific peptides,

Lane 2: Mouse liver, Lane 3: 293 cells, Lane 4: HepG2 cells.

BF8019 staining HepG2 cells by IF/ICC. The samples were fixed with PFA and permeabilized in 0.1% Triton X-100, then blocked in 10% serum for 45 minutes at 25°C. Samples were then incubated with primary Ab(#BF8019) and rabbit anti-beta tubulin Ab(#AF7011) for 1 hour at 37°C. An AlexaFluor594 conjugated goat anti-mouse IgG Ab(Red) and an AlexaFluor488 conjugated goat anti-rabbit IgG Ab(Green) were used as the secondary Ab.

The nuclear counter stain is DAPI (blue).

<code>IMPORTANT:</code> For western blot, incubate membrane with diluted primary Ab in 5% w/v milk , 1X TBS, 0.1% Tween@20 at 4°C with gentle shaking, overnight.
