Catalog Number:ATMP02511COV Recombinant SARS-CoV-2 (2019-nCoV) S Protein RBD

Protein S (PROS1) is glycoprotein and expressed in many cell types supporting its resolute. Whether in the protein Interaction with the human ACE2 receptor. The spike protein is a large type I transmembrane protein containing two subunits, S1 and S2. S1 mainly contains a receptor binding domain (RBD), which is responsible for recognizing the cell surface receptor. S2 contains basic elements needed for the membrane fusion. The S protein plays key parts in the induction of neutralizing-antibody and T-cell responses, as well as protective immunity.
