

p53 Ab

•		
Cat.#: BF0604 Size: 50ul,100ul,200ul	Concn.: 1mg/ml Source: Mouse	Mol.Wt.: 43.7kDa Clonality: Monoclonal
Application:	ELISA 1/10000, WB 1/500 - 1/2000, IHC 1/200 - 1/1000 IF 1:200	
Reactivity:	Human,Mouse,Rat	
Purification:	Affinity-chromatography.	
Specificity:	p53 Ab detects endogenous levels of total p53.	
lmmunogen:	Purified recombinant fragment of human p53 expressed in E. Coli.	
Uniprot:	P04637	
Description:	p53 responds to diverse cellular stresses to regulate target genes that induce cell cycle arrest, apoptosis, senescence, DNA repair, or changes in metabolism. p53 protein is expressed at low level in normal cells and at a high level in a variety of transformed cell lines, where it's believed to contribute to transformation and malignancy. p53 is a DNA- binding protein containing transcription activation, DNA- binding, and oligomerization domains. It is postulated to bind to a p53-binding site and activate expression of downstream genes that inhibit growth and/or invasion, and thus function as a tumor suppressor. Mutants of p53 that frequently occur in a number of different human cancers fail to bind the consensus DNA binding site, and hence cause the loss of tumor suppressor activity. Alterations of this gene occur not only as somatic mutations in human malignancies, but also as germline mutations in some cancer-prone families with Li-Fraumeni syndrome. Multiple p53 variants due to alternative promoters and multiple alternative splicing have been found. These variants encode distinct isoforms, which can regulate p53 transcriptional activity.	
Subcellular Location:	Cytoplasm; Cytoplasm. Nucleus Endoplasmic reticulum. Interact nuclear localization. Recruited i CHEK2; Nucleus. Cytoplasm. Lo cytoplasm in most cells. In som nucleus that are different from Localized in the nucleus in mos cytoplasm in some cells; Nucleu mainly in the nucleus with mino Nucleus. Cytoplasm. Predomina the cytoplasm when expressed	tion with BANP promotes nto PML bodies together with calized in both nucleus and e cells, forms foci in the nucleoli; Nucleus. Cytoplasm. t cells but found in the us. Cytoplasm. Localized or staining in the cytoplasm; antly nuclear but localizes to

Cytoplasm. Predominantly nuclear but translocates to the cytoplasm following cell stress.

- Tissue Specificity: Ubiquitous. Isoforms are expressed in a wide range of normal tissues but in a tissue-dependent manner. Isoform 2 is expressed in most normal tissues but is not detected in brain, lung, prostate, muscle, fetal brain, spinal cord and fetal liver. Isoform 3 is expressed in most normal tissues but is not detected in lung, spleen, testis, fetal brain, spinal cord and fetal liver. Isoform 7 is expressed in most normal tissues but is not detected in prostate, uterus, skeletal muscle and breast. Isoform 8 is detected only in colon, bone marrow, testis, fetal brain and intestine. Isoform 9 is expressed in most normal tissues but is not detected in prostate. Isoform 9 is expressed in most normal tissues but is not detected in prostate.
- Similarity: The nuclear export signal acts as a transcriptional repression domain. The TADI and TADII motifs (residues 17 to 25 and 48 to 56) correspond both to 9aaTAD motifs which are transactivation domains present in a large number of yeast and animal transcription factors.Belongs to the p53 family.
- Storage Condition and
Buffer:Mouse IgG1 in phosphate buffered saline (without Mg2+ and
Ca2+), pH 7.4, 150mM NaCl, 0.02% sodium azide and 50%
glycerol.Store at -20 °C.Stable for 12 months from date of
receipt.

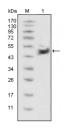

Figure 1: Western blot analysis using p53 mouse mAb against HEK293 cell lysate(1).

Figure 2: Immunohistochemical analysis of paraffin-embedded human esophageal cancer (left) and lung cancer (right), showing nuclear localization using p53 mouse mAb with DAB staining.

IMPORTANT: For western blot, incubate membrane with diluted primary Ab in 5% w/v milk , 1X TBS, 0.1% Tween@20 at 4°C with gentle shaking, overnight.

For Research Use Only. Not for use in diagnostic and therapeutic procedures. Not for resale without express authorization.
