

#### RPC326Mu01 100µg

### Recombinant B-Cell CLL/Lymphoma 10 (Bcl10)

Organism Species: Mus musculus (Mouse)

Instruction manual

kDa 70

44

33

26

FOR IN VITRO USE AND RESEARCH USE ONLY
NOT FOR USE IN CLINICAL DIAGNOSTIC PROCEDURES

10th Edition (Revised in Jan, 2014)

# [PROPERTIES]

Residues: Met1~Gln233

Tags: Two N-terminal Tags, His-tag and T7-tag

Accession: Q9Z0H7

Host: E. coli

**Subcellular Location:** Cytoplasm, Membrane.

**Purity: >90%** 

**Endotoxin Level:** <1.0EU per  $1\mu g$  (determined by the LAL method).

**Formulation:** Supplied as lyophilized form in PBS, pH7.4, containing 5% trehalose, 0.01% sarcosyl.

Predicted isoelectric point: 6.2 Predicted Molecular Mass: 29.6kDa 18 14 10 15% SDS-PAGE

Applications: SDS-PAGE; WB; ELISA; IP.

(May be suitable for use in other assays to be determined by the end user.)

**Note:** The possible reasons that the actual band size differs from the predicted are as follows:

Accurate Molecular Mass: 35kDa as determined by SDS-PAGE reducing conditions.

- 1. Splice variants: Alternative splicing may create different sized proteins from the same gene.
- 2. Relative charge: The composition of amino acids may affects the charge of the protein.
- 3. Post-translational modification: Phosphorylation, glycosylation, methylation etc.
- 4. Post-translation cleavage: Many proteins are synthesized as pro-proteins, and then cleaved to give the active form.
- 5. Polymerization of the target protein: Dimerization, multimerization etc.

### [USAGE]

Reconstitute in sterile PBS, pH7.2-pH7.4.

# [STORAGE AND STABILITY]

Storage: Avoid repeated freeze/thaw cycles.

Store at 2-8°C for one month.

Aliquot and store at -80°C for 12 months.

**Stability Test:** The thermal stability is described by the loss rate of the target protein. The loss rate was determined by accelerated thermal degradation test, that is, incubate the protein at 37°C for 48h, and no obvious degradation and precipitation were observed. (Referring from China Biological Products Standard, which was calculated by the Arrhenius equation.) The loss of this protein is less than 5% within the expiration date under appropriate storage condition.

## [SEQUENCES]

The sequence of the target protein is listed below.
